# QCPP Vaccine Fridges G2

### Description

The new and improved Medisafe G2 series is now available, designed and purpose-built for vaccine storage. Each unit is supplied with a preconfigured temperature control system ensuring consistent temperatures are held on all shelves between 2°C & 8°C, which is a QCPP approved specification. All units come with the Medisafe data logger system, and software, which allows quick and easy download of temperature history to any compatible computer. Available in three sizes.

### Features
