SKOPE-connect™

Puts you in control of your fridge

SKOPE-connect is a new app that puts the power in your hands so you can monitor and control the fridge from your smartphone or tablet.

Now you can easily maximise the performance and efficiency of your fridges to help manage the profitability of your business.

Four quick steps to get started...

- 1 Download the app from Apple App Store or Google Play Store or scan the QR code sticker on your new ActiveCore 2 fridge.
- 2 Register user and fridge details following the app instructions
- 3 Connect to applicable fridges via Bluetooth™
- 4 Navigate between the screens and configure fridge settings

Connect and Control via Bluetooth™

Individual & multiple ActiveCore 2 fridges across venues.

Review the History

24 hour quick view summary or up to 5 months of graphical information for fridge temperature, energy use and door openings.

Know the Energy Use

Drill down into energy consumption by day, week, or month in both kWh and \$ value.

Set the Product Temperature

Quick select setting of fridge temperature based on the product inside; 7 pre-set product types and manual control.

Support HACCP- Monitor & Export

Display and export fridge temperature data and raise an alert if the temperature exceeds the limits you set.

Control the Lighting

Basic on/off control or set on a more advanced activity basis such as door openings or store- venue opening and closing hours.

Make it Quieter

One touch Hush Mode quietens the fridge making it ideal for customer service areas.

Comprehensive Alarms

Provides a description of the fridge fault and the recommended action to rectify it.
