- Brighter and longer - lasting **LED Interior Display System** provides attractive, enhanced lighting compared to fluorescent lighting; saves energy by producing less heat while maximizing display area visibility,
- The entire cabinet structure is foamed - in - place using CFC - free, **High - Density Polyurethane Insulation**,
- freezers are designed with oversized and balanced cooling systems; **Efficient Cooling Systems** include efficient evaporators and condensers for increased efficiency and faster freezing,
- is the first to replace a frame heater with a **Compressor - Generated Heat Method** in the industry; This eliminates any unnecessary energy consumption while providing efficient freezing performance,
- One - piece **Magnetic Door Gaskets** can be removed without tools to clean and replace them easily,
- **Adjustable, heavy duty, PE(polyethylene) coated wire shelves**,
- **Triple Pane Air Insulated Layer Glass Doors** equipped with unique three - pane glass doors with a layer of patented, transparent thermal insulating film applied between glass layers; Lightweight door design reduces door maintenance and roller/bushing wear and facilitates smooth opening of doors,
- Customer fatigue fades with easy grip handles and doors that are easy to open; Together with self - closing doors, **Ergonomically Designed Doors** make this the ultimate choice for customers,
- **Door locking system** standard,
- **Modern Product Designs** are user-friendly by harmonizing curvature and stiffness while preserving the product's highest visibility and esthetics,
- **Low-E triple heated glass** standard.
