This Rinnai rice cooker is safe and easy to use, employing automatic shut-off when cooking is complete without any sticking or burning available for both natural gas (at 10.3kW) and LP gas (at 10.0kW).

Natural Gas Model

Straightforward controls mean the cooker can be set, loaded and ignited with ease.

A safety valve ensures correct lighting for the pilot and main burner.

A Piezo system is installed for quick and easy ignition, without the need for electricity or matches.

For added safety, a flame-check allows the user full view of the flame through view-holes on the side of the heat shroud.

The innovative burner is designed to distribute heat evenly and safely to prevent overcooking.

The gas pressure is kept constant with a fully automatic regulator

Description
