Introducing the Turbo Air K-Series KUF12-2D-4-N(HC) 4 Solid Drawer Under Counter Freezer, a reliable and efficient freezing solution for commercial kitchens. This underbench freezer features four spacious drawers, providing convenient storage for your frozen ingredients and products. With a left-hand side compressor and a front breathing system, this freezer ensures optimal performance and easy installation. The digital temperature control system and high-tech monitor allow precise temperature adjustments and real-time monitoring to maintain ideal freezing conditions. The unit utilizes HC refrigerant and incorporates a hot gas condensate system for efficient operation. With a capacity for four full-size 150mm deep GN pans (4 X 1/1 GN pans), this freezer offers ample space for your storage needs. The ventilated cooling system and high-density, CFC-free polyurethane insulation guarantee uniform temperatures and energy efficiency.

Description

The Turbo Air K-Series KUF12-2D-4-N(HC) 4 Solid Drawer Under Counter Freezer is a reliable and efficient freezing solution designed for commercial kitchens. With its practical design and durable construction, this underbench freezer offers convenient storage and easy access to your frozen ingredients.

Featuring four drawers, this freezer allows for organized and separate storage of different items. It can accommodate four full-size 150mm deep GN pans (4 X 1/1 GN pans), providing flexibility in storing various ingredients or prepared dishes. Please note that GN pans are not included with the freezer. Equipped with a digital temperature control system and a high-tech monitor, you can easily adjust and monitor the freezer's temperature to ensure optimal storage conditions. The left-hand side compressor and front breathing system make this freezer suitable for installation under counters or in tight spaces.

The Turbo Air KUF12-2D-4-N(HC) utilizes HC refrigerant and features a hot gas condensate system, ensuring efficient and environmentally friendly operation. The ventilated cooling system promotes even temperature distribution, while the high-density and CFC-free polyurethane insulation provide excellent thermal insulation to maintain the desired temperature range of -21 to -12 degrees Celsius.
